## PERSONAL SUMMARY

I am an enthusiastic and ambitious self-taught developer with a passion for learning. I am a hardworking and motivated individual, with a proven track record of delivering and meeting objectives to an exemplary standard. I have a solid foundation in HTML and CSS. I have also developed an extensive and in-depth understanding of JavaScript - including both vanilla ES5 and ES6, as well as frameworks and libraries such as jQuery and also React and its surrounding ecosystem.

## TECHNICAL SKILLS

- Knowledge of HTML, CSS/SCSS; JavaScript; ES5, ES6, React, Redux, jQuery.
- Jasmine testing framework.
- Build tools including Webpack and Gulp.
- Experience with Git version control.
- Functional and growing capability with NodeJS, Express, RESTful APIs, and MongoDB.

## PROJECTS

**Fit-Search** - [fit-search.herokuapp.com](https://fit-search.herokuapp.com) (you may have to wait a few seconds for the application to wake-up)

Fit-Search is a personal trainer search and review application. Fit-Search features unique trainer search and review systems which help people to find trusted, high quality, personal trainers across England. The application is built using React and Redux on the front-end, with an API back-end built using Express and MongoDB.

**soccer.js** - [jrobind.github.io/soccer.js](https://jrobind.github.io/soccer.js)

soccer.js is a simple open source JavaScript library used for quickly building responsive and easily updateable soccer league tables. The library also includes features such as; reverse functionality and the ability to create a collapsable table. League teams, are by default, automatically sorted by points, then by goal difference, goals scored, and lastly, alphabetically.

**Geoggle** - [jrobind.github.io/Geoggle](https://jrobind.github.io/Geoggle)

Geoggle is a countries of the world quiz game built using vanilla ES6 and styled using Saas. Quiz questions are based on country flags, capitals, populations, and world regions and subregions. Players receive instant feedback for every question answered, making the application fun as well as educational.

**Issue-track** - [jrobind.github.io/Issue-track](https://jrobind.github.io/Issue-track)

Issue-track is an issue/bug tracking application built using ES5 JavaScript. The application enables users to submit issues based on their type (bug, issue etc) and their severity. Issue-track also features a filter system allowing users to filter issues by their current status (open or closed) and also by severity.

## ACADEMIC QUALIFICATIONS

**University of Essex - BSc Sport and Exercise Science 2011– 2014**

- 1st class classification - 78%.
- Received the 'Richard Watson Prize' for the most outstanding performance on a Sports Science degree.

## EMPLOYMENT HISTORY

- Full time front-end web development study - August 2017 - present.
- Co-Founder of The LiquorLab Cocktail Bar - November 2016 - June 2017.
- Customer Advisor at B&Q Warehouse - June 2014 - September 2016.
- Fitness Advisor at the University of Essex Sports Centre - October 2013- June 2014.

## PROFESSIONAL AND PERSONAL SKILLS

- Highly organised and assiduous, with a keen eye for detail.
- High level of interpersonal and written skill.
- Strong team player, able to lead when appropriate and motivate others.
- Climbed Mont Blanc the highest mountain in Western Europe twice, unguided.
